

TechCorp SaaS Platform

Product Guide v2.0

For Sales, Support, and Customer Success Teams | Last Updated: March 2025

1. Product Overview

TechCorp's Enterprise SaaS Platform is a cloud-native business intelligence and workflow automation solution designed for mid-market and enterprise customers. It integrates data ingestion, AI-powered analytics, and cross-team collaboration in a single unified interface.

The platform is accessible via web browser, iOS/Android mobile apps, and a REST API. It supports SSO via SAML 2.0, SCIM provisioning, and integrates natively with Slack, Google Workspace, Microsoft 365, Salesforce, and Jira.

2. Core Features

2.1 AI-Powered Analytics Dashboard

The dashboard provides real-time KPI monitoring with natural language querying. Users can ask questions like 'Show me revenue by region last quarter' and receive instant chart responses. Supports 40+ chart types with drill-down capability and scheduled report delivery.

2.2 Automated Workflow Engine

Build no-code automation workflows with 200+ pre-built connectors. Triggers include time-based, event-based, and webhook-based options. Workflows support conditional branching, parallel execution, and retry logic with exponential backoff. Version history tracks all workflow changes.

2.3 Document Intelligence Module

Upload PDFs, DOCX, and Excel files for AI extraction of structured data. Supports OCR for scanned documents. Extracted data flows directly into dashboards and workflows. Supports batch upload of up to 500 files per job.

2.4 Team Collaboration Suite

Comment threads, task assignments, and @mentions across all modules. Version history for dashboards and workflows (90-day retention on Starter, unlimited on Business/Enterprise). Guest access with configurable permissions for external stakeholders.

2.5 Security and Compliance

SOC 2 Type II certified. End-to-end encryption at rest (AES-256) and in transit (TLS 1.3). Role-based access control (RBAC) with audit logs. GDPR, HIPAA, and CCPA compliant on Enterprise tier. Annual third-party penetration testing.

3. Pricing Tiers

Feature	Starter (\$29/mo)	Business (\$99/mo)	Enterprise (Custom)
Users	Up to 5	Up to 50	Unlimited
Data Sources	3	20	Unlimited
AI Queries/month	500	5,000	Unlimited
Workflow Automations	10 active	100 active	Unlimited
Storage	10 GB	100 GB	Custom (min 1 TB)
API Access	Read-only	Full CRUD	Full + webhooks
SSO / SAML	No	Yes	Yes + SCIM
Audit Logs	30 days	1 year	Unlimited
SLA Uptime	99.5%	99.9%	99.99%
Support	Email (48h)	Priority (4h)	Dedicated CSM + 1h
HIPAA/GDPR BAA	No	No	Yes
Custom Integrations	No	No	Yes
Price	\$29/user/mo (min 1)	\$99/user/mo (min 5)	Contact sales

4. Integration Catalog

- CRM: Salesforce, HubSpot, Zoho CRM, Pipedrive
- Productivity: Google Workspace, Microsoft 365, Notion, Confluence
- Communication: Slack, Microsoft Teams, Zoom, Webex
- Project Management: Jira, Asana, Linear, Monday.com, ClickUp
- Data Warehouses: Snowflake, BigQuery, Redshift, Databricks, Firebolt
- Databases: PostgreSQL, MySQL, MongoDB, Supabase, PlanetScale
- Cloud Storage: AWS S3, Google Cloud Storage, Azure Blob, Dropbox
- Payments: Stripe, Razorpay, Braintree, Chargebee

5. Common Use Cases by Industry

Industry	Primary Use Case	Key Features Used	Typical Plan
E-commerce	Sales analytics + inventory alerts	Dashboard, Workflow Engine	Business
Healthcare	Patient data reports + HIPAA compliance	DocuIntelligence, Audit Logs	Enterprise
Fintech	Transaction monitoring + fraud alerts	Real-time analytics, Webhooks	Enterprise
SaaS/Tech	Product metrics + customer health scores	AI modules	Business/Enterprise
Retail	Store performance + supply chain tracking	Dashboard, Integrations	Starter/Business

6. Roadmap (H2 2025)

Upcoming features include: GPT-4o integration for enhanced document Q&A;, mobile app offline mode, advanced anomaly detection with ML-based alerting, Salesforce bi-directional sync, multi-currency support for Enterprise billing, and a public developer marketplace for custom connectors.
